

Using the best technology

Mid Alarms are using the best technology available on the market and are installing alarm systems to the norms and standards which are acceptable in the industry by fully trained technicians. Their control centre and monitoring systems are fully computerized and their control centre operators and reaction personnel are well trained and professional.

Mid Alarms will however investigate the benefits of affiliation with SAIDSA and if it proves that there is mutual benefits for clients and their company, they will persue this matter further.

Mid Alarms would like to invite all their existing clients and any person with a valid interest to visit them and inspect their facilities. Any queries and questions regarding their facilities and services can be directed to their office and they will gladly assist to the best of their ability.

■ Large insurance companies like Mutual and Federal requires services from a SAIDSA accredited security company for insurance purposes when needed.
